

Project Design Phase
Proposed Solution Template

Date	04 July 2026
Project Name	Cosmetic Insights – Navigating Cosmetics Trends and Consumer Insights with Tableau
Maximum Marks	2 Marks

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Consumers are overwhelmed by the vast number of cosmetic products available online. There is a lack of a centralized, additive tool that allows users to compare trending cosmetics based on their skin type, budget, and read consumers' insights. Marketers also lack real-time trend analytics.
2.	Idea / Solution description	The project proposes an interactive Tableau dashboard that lets consumers explore and filter cosmetics products by trend scores, reviews, ingredients, skin type compatibility, and price. The dashboard also allows marketers to view consumer behaviour, top-trending categories, and feedback patterns.
3.	Novelty / Uniqueness	Unlike standard products lists or based on influence reviews, this dashboard provides real-time data visualization and comparison of cosmetics. It empowers users to make informed decisions through verified insights and trend patterns. It's also personalised for skin type and budget — something few tools offer.
4.	Goal Impeded / Customer Satisfaction	This solution boosts consumer confidence by reducing the confusion and stress of online product choices. It also promotes transparency in cosmetics marketing. Marketers can better align their products

		with real needs, Directing D win-win outcome.
